IT Intern | NQF Level 6 | Cape Town

PROFESSIONAL PROFILE

Final-year National Diploma student in Information and Communication Technology (Applications Development) at CPUT, NQF Level 6. Experienced in technical troubleshooting, desktop support, and software development through hands-on academic projects and the CAPACITI AI Skills Acceleration Programme. Comfortable engaging end users to diagnose and resolve issues promptly, with a strong foundation in networking concepts, system environments, and structured problem solving. Eager to contribute to the GrandWest IT Operations team while building practical experience in a dynamic, high-availability environment.

EDUCATION

National Diploma: Information and Communication Technology (Applications Development) 2022 – Present (Final Year)
— Cape Peninsula University of Technology (CPUT)

- NQF Level 6 qualification covering software development, systems analysis, database design, and networking fundamentals.
- Relevant modules: Applications Development Practice, Database Systems, Project Management, Software Engineering.
- Built full-stack applications using Java, Spring Boot, React, and PostgreSQL as part of assessed group projects.

AI Skills Acceleration Programme — CAPACITI 2026

- Completed structured training in AI-powered workplace productivity tools and applied AI concepts in a collaborative project environment.

TECHNICAL SKILLS

Desktop and System Support	Windows OS troubleshooting, software installation and configuration, hardware diagnostics
Networking Fundamentals	TCP/IP, DNS, DHCP, LAN/WAN concepts; applied through coursework and project deployments
Programming and Development	Java, Spring Boot, JavaScript, HTML, CSS, SQL, PostgreSQL, REST APIs, Git/GitHub
Tools and Environments	GitHub Actions (CI/CD), IntelliJ IDEA, VS Code, pgAdmin, Postman, Linux (Ubuntu)
Soft Skills	End-user communication, incident prioritisation, methodical problem solving, attention to detail

PROJECTS

AnimeStore — Full-Stack Online Store — CPUT Capstone Project (Team of 5) 2024 – 2025

- Contributed to backend development using Java 17 and Spring Boot with a PostgreSQL database, building REST API endpoints consumed by a React frontend.
- Applied Test-Driven Development (TDD) using JUnit 5 and set up GitHub Actions for automated CI/CD pipelines, ensuring consistent build quality.
- Collaborated via GitHub on a forked group repository, managing branches, pull requests, and code reviews as a team.

UniTrade — Student Marketplace Web Application — CPUT Group Project 2024

- Built a web-based marketplace for students using Spring Boot, JavaScript, HTML, and CSS.
- Designed and implemented data models, dashboard wireframes, and user-facing features, following iterative development and documentation practices.

Personal Portfolio Website — Personal Project 2025 – 2026

- Designed and deployed a portfolio site using HTML and CSS (separate files) via GitHub Pages, featuring a dark navy hero section, bento-style card layout, and CV download functionality.

EXTRACURRICULAR AND VALUES

Passionate about youth empowerment and actively look for ways to contribute to community development through technology. Enjoy applying logical thinking outside of academic work through puzzle and strategy games. Committed to continuous learning and keeping up with developments in software and IT infrastructure.
